

Job Profile: Junior Offensive Security Tester

About the Company

At ThreatSpike Labs we believe that security should be a commodity. We are working to give all companies access to the strongest, most sophisticated security without having to worry about their budget, expertise or team size.

About the Job

At threatspike labs we are looking for a new junior offensive security tester. This role will involve coverage of a wide spectrum of red team engagements including but not limited to web app testing, phishing campaigns, physical penetration testing and automated vulnerability scanning. This role is placed in the red team but opportunities for SOC shadowing and incident response are available should the candidate wish to pursue them.

A perfect candidate would have:

- Motivation, passion and determination, with a willingness to learn and independently take on new challenges
- Excellent problem-solving skills, taking on new challenges, researching, and effectively solving problems with some guidance from senior members of the team
- Understanding and interest in low level concepts including operating systems, networking, networking protocols, and the OSI model
- Interest in CTFs, HackTheBox, etc., or work towards relevant certifications are a plus
- a desire and ability to learn new topics and new technologies
- Experience with programming
- Hands on experience using different operating systems and networking technologies
- Excellent communication skills
- Strong computing fundamentals

In this role you will be trained on the use of and expected to use various industry standard and in-house tools:

- Burpsuite Pro
- Dirbuster
- GoPhish
- Nessus
- ThreatSpike Wire
- Wireshark
- EvilGinx

Learning and Development

Any candidate must have the ability and desire to understand and learn new concepts on their own in addition to the training we will provide. We are committed to helping the selected candidate obtain professional certifications.

Location

This is a remote role and we are hiring in the following countries:

- United Kingdom
- France
- United States
- Singapore
- United Arab Emirates

Should the candidate be London-based, there is an opportunity for hybrid working from our Mayfair office to socialise and collaborate with other members of the team.
